AER LINGUS LIMITED / DISPATCH AGENT

JULY 2008 - PRESENT, HEAD OFFICE BUILDING, DUBLIN AIRPORT, IRELAND

- Supervise a dispatching process of catering to airplanes
- Security check of dispatched flights
- Cooperation with control stations to ensure on time process
- Strong teamwork to ensure uninterrupted flight schedules

PROJECTS

Explore App / 2nd Year Project (DID)

This project included designing and developing a mobile application.

Explore App is a tourist guide mobile application that works on Android devices. The application is based on Angular.js 1 and IONIC frameworks. I handle the authentication process by using Firebase service. Location-based service, Google Maps API is used to locate the nearest point of interest and present basic information about places then by integrating Wikipedia API and extracting more information user have to access to more details about specific places.

Project Website 2nd Year Project (DID)

This project included designing and developing a single page application.

Project Website is a platform for me to keep my project in one place during my learning process. Website uses AngularJs 1.x, JavaScript, JQuery, Bootstrap, Sass.

The fully responsive website collects a series of Blogs, designing, coding examples.
